

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 3 – Project Design Phase

High-Level Design

User

- Service Catalog
- Hardware
- Standard Laptop
- Order Now
- Service Request
- Approval
- Flow Designer
- Create Catalog Task
- Hardware Assignment
- Laptop Configuration

Flow Design

Trigger

Use the **Service Catalog** trigger.

Action

Use **Create Catalog Task**.

Data Mapping

- **Request item:** Requested Item Record
- **Short description:** Laptop need to Configured
- **Description:** Laptop need to Configured
- **Assignment group:** Hardware
- **Approval:** Approved

Service Catalog Design

The Standard Laptop catalog item is connected to the created flow through its Process engine configuration.

Result

The design ensures that approval becomes the condition for automatically generating the hardware configuration task.
