

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 5 – Project Development Phase

Milestone 1: Create the Flow

- i. Open ServiceNow.
- ii. Go to All and search for Flow Designer.
- iii. Open Flow Designer under Process Automation.
- iv. Select New → Flow.
- v. Set Flow Name to **Standard laptop task**.
- vi. Set Application to **Global**.
- vii. Select **System user** as Run user.
- viii. Submit.

Configure Trigger

- Select Add a trigger.
- Search for **Service Catalog**.
- Select the Service Catalog trigger.
- Click Done.

Configure Action

1. Select Add an action.
2. Search for **Create Catalog Task**.
3. Select Create Catalog Task.
4. Drag the **Requested Item Record** into Request item.
5. Confirm the table is populated as Catalog Task.
6. Set Short description to **Laptop need to Configured**.
7. Add Description with value **Laptop need to Configured**.
8. Set Assignment group to **Hardware**.
9. Set Approval to **Approved**.
10. Leave remaining fields at their defaults.
11. Click Done.
12. Save the flow.

13. Activate the flow.

Milestone 2: Assign the Flow

1. Open All → Maintain Items.
2. Search for **Standard Laptop**.
3. Open the Standard Laptop record.
4. Open Process engine.
5. Remove remaining automations if applicable.
6. Add the Flow.
7. Select **Standard Laptop Task**.
8. Save the record.

Development Result

The Standard Laptop catalog request is connected to the automation that creates the Hardware configuration task after approval.
